

## SAFETY MEETING TOPIC

This form shall be completed and kept on file

Job Name \_\_\_\_\_ Location \_\_\_\_\_ Job No. \_\_\_\_\_

Meeting Leader \_\_\_\_\_ Title \_\_\_\_\_

Date Held \_\_\_\_\_ Place \_\_\_\_\_ Time \_\_\_\_\_

Subject of Meeting \_\_\_\_\_ PULLING WIRE AND CABLE \_\_\_\_\_

1. Make sure everyone that is going to be involved in the cable pull knows their job and where everyone else will be working.
2. By means of in-sight signals, power phones or walkie-talkies, maintain a line of communication open among everyone involved. Before starting the pull make sure everyone is aware of what signals will be used and their meaning.
3. practical, appoint someone to follow the cable along it's route so that if any problems occur the pull can be stopped to rectify the situation.
4. Before each pull, check all ropes etc. for damage, make sure all wheels and pulleys turn freely and that the puller is properly secured.

ALWAYS REMEMBER. PULLING ROPE AND ASSOCIATED EQUIPMENT HAVE BREAKING POINT. When first starting a pull, put tension on the pull and stop. Go back and check all ropes, rigging and angles.

Do not stand "in the line of fire" when tension is on the pulling equipment.
